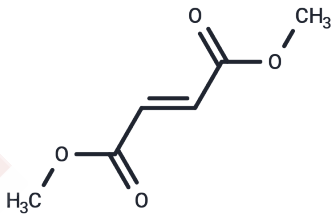
Data Sheet (Cat.No.T0492)

TargetMol

Dimethyl fumarate

Chemical Properties



CAS No. : 624-49-7

Formula: C6H8O4

Molecular Weight: 144.13

Appearance: no data available

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Biological Description

Description	Dimethyl fumarate (DMF) is an Nrf2 activator with oral activity and blood-brain barrier permeability. Dimethyl fumarate has antimicrobial, anti-inflammatory, and immunomodulatory activities and has been used in the study of multiple sclerosis.
Targets(IC50)	Reactive Oxygen Species,HIV Protease,Nrf2,Endogenous Metabolite,Autophagy
In vitro	**METHODS**: Primary cortical cultures or hippocampal HT22 cells were treated with Dimethyl fumarate (10 μM) and glutamate for 24 h. Cell viability was measured by Cell Titer Blue (CTB) assay. **RESULTS**: Pre-incubation with 10 μM MMF Dimethyl fumarate for 24 h protected primary cortex cultures and hippocampal HT22 cells from oxidized glutamate toxicity. [1] **METHODS**: Tumor cells CT26 were treated with Dimethyl fumarate (100 μM) for 3-24 h. LDH release was detected by LDH cytotoxicity assay kit. **RESULTS**: Dimethyl fumarate time-dependently increased LDH release, which reflected necrotic cell death. [2]
In vivo	**METHODS**: To study the effects on Friedreich's ataxia (FA), Dimethyl fumarate (110 mg/kg) was administered orally to a FXNKD mouse model of FA once daily for 18 weeks. **RESULTS**: Dimethyl fumarate rescued these enzyme activities in the brain of the FXNKD mouse model and rescued frataxin and cytochrome oxidase expression in the brain, cerebellum, and quadriceps muscle. [3]

Solubility Information

Solubility	DMSO: 15 mg/mL (104.07 mM),Sonication is recommended. 10% DMSO+90% Saline: 1.5 mg/mL (10.41 mM),Solution. Ethanol: 7.2 mg/mL (49.95 mM),Sonication is recommended. 5% DMSO+95% Saline: 0.29 mg/mL (2.01 mM),Solution. (< 1 mg/ml refers to the product slightly soluble or insoluble)

Preparing Stock Solutions

	1mg	5mg	10mg
1 mM	6.9382 mL	34.6909 mL	69.3818 mL
5 mM	1.3876 mL	6.9382 mL	13.8764 mL
10 mM	0.6938 mL	3.4691 mL	6.9382 mL
50 mM	0.1388 mL	0.6938 mL	1.3876 mL

Please select the appropriate solvent to prepare the stock solution, according to the solubility of the product in different solvents. Please use it as soon as possible.
