Biological Description

Description	4'-Methoxyflavonol is a synthetic flavonol with an additional 3-hydroxyl group and higher antioxidant capacity than 4'-Methoxyflavone. 4'-Methoxyflavonol interacts with the lipid bilayer of DPPC model membranes, and is capable of scavenging free radicals and antioxidant activity in DPPH assays, and exhibits some antiproliferative activity against K562 and MCF-7 cancer cell lines.
Targets(IC50)	Free radical scavengers
