

Iniparib

Chemical Properties

CAS No. :	160003-66-7
Formula:	C ₇ H ₅ IN ₂ O ₃
Molecular Weight:	292.03
Appearance:	no data available
Storage:	Powder: -20°C for 3 years In solvent: -80°C for 1 year

Biological Description

Description	Iniparib (BSI-201) (BSI-201) , a PARP1 inhibitor, exhibits potency in triple-negative breast Y (TNBC).
Targets(IC50)	Influenza Virus,PARP
In vivo	In 855-2 cells, the combination of BSI-201 (120 μ M) and buthionine sulfoximine induced cell death up to 95%, which was similar to the effect on other human tumor cells. In E-ras 20 cells, BSI-201 inhibited cell growth, and its effect was enhanced 20-fold when combined with buthionine sulfoximine. BSI-201 (100 μ M) inhibited the repair of ionizing radiation-induced single-strand breaks (SSBs) in human lymphocyte cell lines.
Cell Research	Cells are exposed to various concentrations of BSI-201 for 5, and 9 days in the presence or absence of buthionine sulfoxamide (BSO). After treatment, cell proliferation is measured by CellTiter-Glo assay.(Only for Reference)

Solubility Information

Solubility	Ethanol: 14.6 mg/mL (49.99 mM),Sonication is recommended. DMSO: 85 mg/mL (291.07 mM),Sonication is recommended. (< 1 mg/ml refers to the product slightly soluble or insoluble)

Preparing Stock Solutions

	1mg	5mg	10mg
1 mM	3.4243 mL	17.1215 mL	34.2431 mL
5 mM	0.6849 mL	3.4243 mL	6.8486 mL
10 mM	0.3424 mL	1.7122 mL	3.4243 mL
50 mM	0.0685 mL	0.3424 mL	0.6849 mL

Please select the appropriate solvent to prepare the stock solution, according to the solubility of the product in different solvents. Please use it as soon as possible.
