Biological Description

Description	VU0357121, a positive allosteric modulator of mGlu5 (EC ₅₀ : 33 nM), is inactive or very weakly antagonizing at other mGlu receptor subtypes.
Targets(IC ₅₀)	GluR
In vitro	VU0357121 do not bind at the MPEP allosteric site of mGlu5, thus do not possess mGlu5 NAM activity. The A809V/rmGlu5 mutation inhibited the ability of VU0357121 to shift the glutamate concentration?response curve, whereas the response to VU0357121 is not altered by the F585I/rmGlu5 mutation. [1] VU0357121 show weaker cooperativity in the Ca ²⁺ mobilization assay in the low-expressing HEK293A-mGlu5 cell line. [2]
