

## AP-III-a4

## Chemical Properties

CAS No. : 1177827-73-4

Formula: C<sub>31</sub>H<sub>43</sub>FN<sub>8</sub>O<sub>3</sub>

Molecular Weight: 594.72

Appearance: no data available  
store at low temperature

Storage: Pure form: -20°C for 3 years | In solvent: -80°C for 1 year

## Biological Description

Description	AP-III-a4 (ENOblock) (ENOblock) is the first nonsubstrate analogue inhibitor of enolase with IC <sub>50</sub> of 0.576 $\mu$ M.
Targets(IC <sub>50</sub> )	Glucokinase
In vitro	AP-III-a4 induces glucose uptake and inhibits phosphoenolpyruvate carboxykinase (PEPCK) expression in Huh7 hepatocytes and HEK kidney cells. AP-III-a4 induces cell death under hypoxia, and inhibits cancer cell migration and invasion by down-regulation of AKT and Bcl-xL expression in HCT116 cells.
In vivo	AP-III-a4 (10 $\mu$ M) inhibits cancer cell migration and invasion processes in HCT116-xenotransplanted zebrafish tumor model. In vivo, AP-III-a4 (10 $\mu$ M) also inhibits adipogenesis and foam cell formation, and causes downregulation of PEPCK expression and induction of glucose uptake.
Kinase Assay	Enolase activity assay is in the 2.0 mM MgSO <sub>4</sub> and 400 mM KCl in the absence or presence of ENOblock or NaF, at 37°C by incubating pure enolase (3-9 U) in a buffer containing 50 mM imidazole-HCl (pH 6.8). The reaction is initiated by adding 1 $\mu$ mol of 2-phospho-D-glycerate, and the OD is measured after 10 min of reaction time with a spectrophotometer at 240 nm.
Cell Research	HCT116 cells(3 x 10E5) are seeded in a 6 well plate. 24 h later, cells are treated with AP-III-a4 (5 $\mu$ M) for 24hours.
Animal Research	In HCT116-xenotransplanted zebrafish tumor xenograft model, were treated with AP-III-a4 of 10 $\mu$ M.

## Solubility Information

Solubility	DMSO: 50 mg/mL (84.07 mM),Sonication is recommended. H <sub>2</sub> O: < 1 mg/mL (insoluble or slightly soluble) (< 1 mg/ml refers to the product slightly soluble or insoluble)
------------	--

### Preparing Stock Solutions

	1mg	5mg	10mg
1 mM	1.6815 mL	8.4073 mL	16.8146 mL
5 mM	0.3363 mL	1.6815 mL	3.3629 mL
10 mM	0.1681 mL	0.8407 mL	1.6815 mL
50 mM	0.0336 mL	0.1681 mL	0.3363 mL

Please select the appropriate solvent to prepare the stock solution, according to the solubility of the product in different solvents. Please use it as soon as possible.
