Biological Description

Description	BRD7552 is an inducer of transcription factor PDX1, which increases insulin expression. BRD7552 increases PDX1 expression in mouse α TC cells but not β TC cells.
Targets(IC50)	Others
In vitro	BRD7552 upregulates PDX1 expression in both primary human islets and ductal cells, and induces epigenetic changes in the PDX1 promoter consistent with transcriptional activation. BRD7552 increases PDX1 mRNA levels by 2- to 4-fold, with a maximal effect at 5 μ M and the expression of MAFA. BRD7552 increases PDX1 expression in mouse α TC cells but not β TC cells. Treatment of PANC-1 cells with BRD7552 causes a dose-dependent increase in insulin mRNA expression. [1]
