Biological Description

Description	Angiotensin III, human, mouse (Angiotensin III, human, mouse(3TFA))(3TFA) is an endogenous angiotensin II receptor (AT2R) agonist(IC ₅₀ s of 0.648 nM).
Targets(IC ₅₀)	RAAS
In vivo	Angiotensin III, human, mouse increased urine sodium excretion, fractional sodium, and lithium excretion. RI coinfusion of specific angiotensin type 2 receptor antagonist PD-123319 abolished Ang III-induced natriuresis[1].
