

AOZ-OVA

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Appearance:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Biological Description

Description	AOZ/OVA is an antigen-adjuvant conjugate of AOZ and ovalbumin (OVA). This conjugation enhances the production of antigen-specific antibodies in vaccine models by linking the antigen to a protein adjuvant. The conjugate maintains protein folding and preserves major epitopes, while also boosting cross-presentation and the generation of antigen-specific T cells.
