

AOZ-BSA

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Appearance:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Biological Description

Description	AOZ/BSA is an antigen-adjuvant conjugate of AOZ and bovine serum albumin (BSA). Conjugating the antigen with a protein adjuvant can enhance the production of antigen-specific antibodies in vaccine models. The conjugate does not affect protein folding or alter major epitopes, and it can enhance cross-presentation and the production of antigen-specific T cells.
