

Eugenol-BSA

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Appearance:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Biological Description

Description	Eugenol/BSA is an antigen-adjuvant conjugate of Eugenol and bovine serum albumin (BSA). Conjugating the antigen with a protein adjuvant enhances the production of antigen-specific antibodies in vaccine models. This conjugate does not disrupt protein folding or alter primary epitopes and can boost cross-presentation and the generation of antigen-specific T cells.
