

Enrofloxacin-BSA

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Appearance:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Biological Description

Description	Enrofloxacin/BSA is an antigen-adjuvant conjugate consisting of Enrofloxacin and bovine serum albumin (BSA). This conjugation enhances the production of antigen-specific antibodies in vaccine models without affecting protein folding or disrupting major epitopes. Additionally, it boosts cross-presentation and the generation of antigen-specific T cells.
