

## AMOZ-BSA

### Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Appearance:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

### Biological Description

#### Description

AMOZ/BSA is an antigen-adjuvant conjugate composed of AMOZ and bovine serum albumin (BSA). Conjugating the antigen with a protein adjuvant enhances the production of antigen-specific antibodies in vaccine models. This conjugate does not affect protein folding or disrupt major epitopes, while also boosting cross-presentation and the generation of antigen-specific T cells.
